ASTJ INDEX TO VOLUME 38, 1992 . (ISSUES 124, 125, 126, 127.)

FEATURES	PAGE	ISSUE
Effective teaching: what can a constructivist view of learning offer? *R Tasker*	25	124
Engaging with scientific language: a functional approach to the language of school science. *R Veel*	31	127
Going in through both ears and staying there: the Salters' approach to science. *J Ramsden*	13	125
How will I know what I think till I see what I say? *K Perkins*	20	127
Images of science and science education. *I Robottom.*	19	125
Information technology: A rationale and needs assessment for school science. *D Lloyd*	31	126
Language in science education: implications for teachers. *L Parker*	26	125
Language in the subject classroom: Some issues for science teachers. *J Barnett*	8	127
Learning about ageing and dying: what can biology education contribute to an integrated school education program? *G White*	7	125
Questioning the teaching of scientific genres. *S Ritchie*	45	127
Science and personal development. *C Malcolm*	8	124
Science competencies and the capable country. *ARuby, P McDermott & M Lond*	11	126
Scientific literacy: What it is, Why it is important and what can scientists do to improve the situation? *E-an Zen*	18	126
The scientific and the everyday: two different ways of knowing. Some implications for science teachers. *C Dawson*	19	124
Teaching and writing in science : Match or mismatch? *G Hoban*	36	127
Television media and the learning of science. *M Hadley*	24	126
Towards community-based science education. *R Muhlebach*	15	125
The mediating role of language in effective science learning : Teacher - in- action and student perceptions. *J Wilson & M McMeniman*	14	127
Writing, comprehension and memorising in science. *S Millar*	39	127
Writing in science: A practioner's account. *J Stewart*	27	127
Writing in science - A teacher's perspective. *S Robinson*	42	127

SCIENCE NOTES		
A dietary survey: an exercise for students of multistrand science. *C Mackie*	51	124
A laboratory illustration of the Solvay process. *J England*	42	125
A practical approach to chemical equilibrium 4: the effect of a catalyst. *G Connor*	42	124
A practical approach to chemical equilibrium 5: measuring the equilibrium constant. *G Connor*	40	125
A practical approach to chemical equilibrium 6 : Acid -base systems. *G Connor*	61	126
A noisy physics practical examination. *M Butler*	45	126
A simple apparatus for measuring the absorption coefficient of liquids. *W M Mat Yunus*	46	125
Assessing oral presentations in science. *F Russo*	59	127
Barrier games. *D Wilson & M Bauer*	70	127
"Be Definite" - A search strategy for resource-based learning. *P Pledger*	53	127
Calculating forces in muscles. *M Caon*	58	126
Computers as science equipment: commercial interfacing packages. *J Gipps*	48	125
Computers as science equipment: Projects in Australia and England. *J Gipps*	46	126
Criterion based assessment and school science. Part2: Choosing areas of study. *R Pallett & J Rataj*	54	124

ASTJ INDEX TO VOLUME 38, 1992 . (ISSUES 124, 125, 126, 127.)

	PAGE	ISSUE
Determination of Na, Ca, Sr and Cu in bottled mineral and tap water. *P Hannaker & S Cocks*	44	124
Explaining genetics: the vegetable people. *D McNevin*	49	124
Faults, folds and properties of rocks. *J Burnett*	62	125
Girls choosing physics at MarionHigh. *M Roach*	58	125
Going to bed for physics. *D Kschammer*	37	126
Green tree frog captive management. *B Luxton*	36	125
Heavy metal wastes: treatment for disposal. *I O'Brien*	44	125
Ideas and activities from various sources. *Editorial compiliation*	61	127
Investigating pergolas. *B Pearsons*	55	126
Legal awareness for science teachers 3: will the school authority support me? *R Manson*	40	124
Making buffers less baffling. *J Thomas*	43	126
Mangrove - samphire - estuary ecosystems : Microscopy and simple aids to their understanding. *B Brock*	50	126
Refractive index of water by total internal reflection. *R Pugh & F Robilliard*	37	124
Scavenger hunt. *D Palmer*	39	125
Schools and management information systems. *P Williams*	54	125
Talking science: Language, learning and values. *J Stewart*	71	127
Teaching interference - another way. *L Ormrod*	35	124
Technical words in science education : Terminology. *D Heinrich*	57	127
The game's the thing # 2 : Devising specific purpose board games. *M O'Toole*	39	126
The word wheel : A language device for use in science classrooms. *D Satterthwait*	50	127
Vela: junior science applications. *G Thurlow*	47	124
RESEARCH		
Conceptions of food and nutrition. *R Francis & D Hill*	65	125
Facilitating the writing of multiple choice tests using Popham's test specification model. *J O'Brien*	62	124
Factors which militate against learning science with understanding. *B Fraser,K Tobin & J Kahle*	63	126
Perceptions of scientists among elementary school children. *T Jackson*	57	124
The presentation sequence of gas properties by physics textbooks and science teachers' reports. *K de Berg & D Treagust*	70	125
SCIENTIST'S VIEWPOINT -		
Associate Professor Michael J Tyler. *Jasmine Payget*	76	125
